SUMMARY

Results-driven **Java Backend Developer** with **2 years of total experience**, including time at TCS (client: American Express) and Bosch, specialising in **Java 8, Spring Boot, Microservices, and Apache Kafka**. Experienced in deploying cloud-native solutions on **AWS** with Docker and Jenkins CI/CD, and delivering full-stack features with **HTML/CSS/JS** and UI/UX design. **Dual AWS Certified** (Cloud Practitioner & AI Practitioner). Proven track record of reducing manual effort by up to **80%** and improving system performance by **25–40%**.

EDUCATION

Sri Krishna College of Engineering and Technology <i>M.Tech in Computer Science Engineering CGPA: 8.51 / 10</i>	<i>Aug. 2019 – May 2024</i> <i>Coimbatore, India</i>
Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, UI/UX Design, Java, Agile, SDLC, Web Technologies, Software Testing	

EXPERIENCE

Tata Consultancy Services (TCS) <i>System Engineer — Java Backend Developer</i>	<i>May 2025 – Present</i> <i>India</i>
- Develop and maintain Microservices-based REST APIs using Java 8 and Spring Boot for the American Express (Amex Search) enterprise intranet search platform, serving a cross-functional team of 12. - Developed and enhanced Spring Boot REST APIs for an enterprise search platform, integrating data from Confluence, SharePoint, and ServiceNow. - Worked with Apache Solr for query optimization, faceting, boosting, and search relevance improvements. - Implemented auto-suggest and promoted search features to enhance user search experience. - Developed Event APIs for capturing user search analytics. - Implement Apache Kafka event-driven pipelines for real-time search indexing, daily trending insights, and result promotion — improving information discoverability enterprise-wide. - Containerise services with Docker and manage CI/CD pipelines via Jenkins; leverage Maven for builds and Log4J2 for structured application logging. - Wrote JUnit test cases and resolved production issues to improve performance and reliability. - Champion code quality through structured peer reviews on IntelliJ IDEA, consistently delivering low-defect, production-ready releases within Agile sprint cycles.	

Bosch Global Software Technologies <i>Software Engineering Intern</i>	<i>Aug. 2023 – May 2024</i> <i>Coimbatore, India</i>
- Engineered a full-stack test automation platform (Python + Robot Framework) adopted across 5+ teams, slashing manual validation time by 40% and lifting reporting accuracy by 30%. - Re-architected critical MySQL queries, achieving a 25% reduction in data retrieval latency and strengthening data pipeline reliability. - Built responsive monitoring dashboards using HTML, CSS, and JavaScript integrated with Grafana and Power BI, accelerating decision-making by 20%. - Developed an automated email notification engine that eliminated 50% of communication delays; led software flashing via QFIL with 99% update accuracy.	

PROJECTS

Grocery Inventory Management System <i>Java, Spring Boot, ReactJS, MySQL, HTML/CSS/JS</i>	
- Built a Spring Boot REST API backend with a ReactJS frontend, reducing stock mismanagement incidents by 50% through real-time inventory tracking. - Designed responsive UI screens in HTML/CSS/JS, improving user engagement by 40% with an intuitive workflow for inventory staff. - Automated restocking alerts via scheduled Spring jobs and optimised SQL queries, cutting manual tracking effort by 60% and improving data retrieval by 35%.	
Automated Test Analysis & Reporting System <i>Java, Spring Boot, JavaScript, MySQL, HTML/CSS</i>	
Architected a Spring Boot-powered reporting engine adopted across 5+ Bosch teams, eliminating 80% of manual report distribution through automated pipelines.	

- Developed a **JavaScript/HTML/CSS** dashboard for real-time test visualisation, reducing defect detection time by **35%** and enabling faster root-cause analysis.
- Deployed the solution on **AWS EC2**, leveraging cloud infrastructure for high availability and zero-downtime test reporting.

Stock Price Prediction System | *Java, Spring Boot, Python, LSTM, HTML/CSS/JS*

- Built a **Spring Boot** REST API to serve ML model predictions, improving end-to-end forecasting accuracy by **20%** using an LSTM model trained on **5+ years** of market data.
- Reduced model Mean Absolute Error (MAE) by **15%** through hyperparameter tuning; delivered an interactive **JavaScript** frontend for visualising stock trends.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS, SQL

Backend: Java 8, Spring Boot, Spring MVC, Spring Data JPA, Microservices, REST API, Hibernate, Maven, Apache Kafka

Frontend: HTML5, CSS3, JavaScript (ES6+), Bootstrap

UI/UX: Figma, Adobe Illustrator, Responsive Design, Wireframing

Databases: MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Jenkins, Git, GitHub, Apache Tomcat

Monitoring & Visualization: Grafana, Power BI

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services
- AWS Certified AI Practitioner — Amazon Web Services
